

Your portable classroom sits complete inside our manufacturing facility following assembly and quality inspection.

Delivery Timeline

Your portable classroom is carefully loaded onto a custom trailer hitched to a specialized CLM truck.

Delivery Timeline

Delivery Timeline

Your portable classroom is prepared and secured for transport to ensure safe and efficient delivery to your schoolground.

Both sections of your portable classroom arrive at your school, marking the beginning of the installation process.

The transport bracing and protective materials are removed from your portable classroom to prepare for positioning.

Delivery Timeline

Delivery Timeline

The first section of your portable is carefully moved into position according to your site plan.

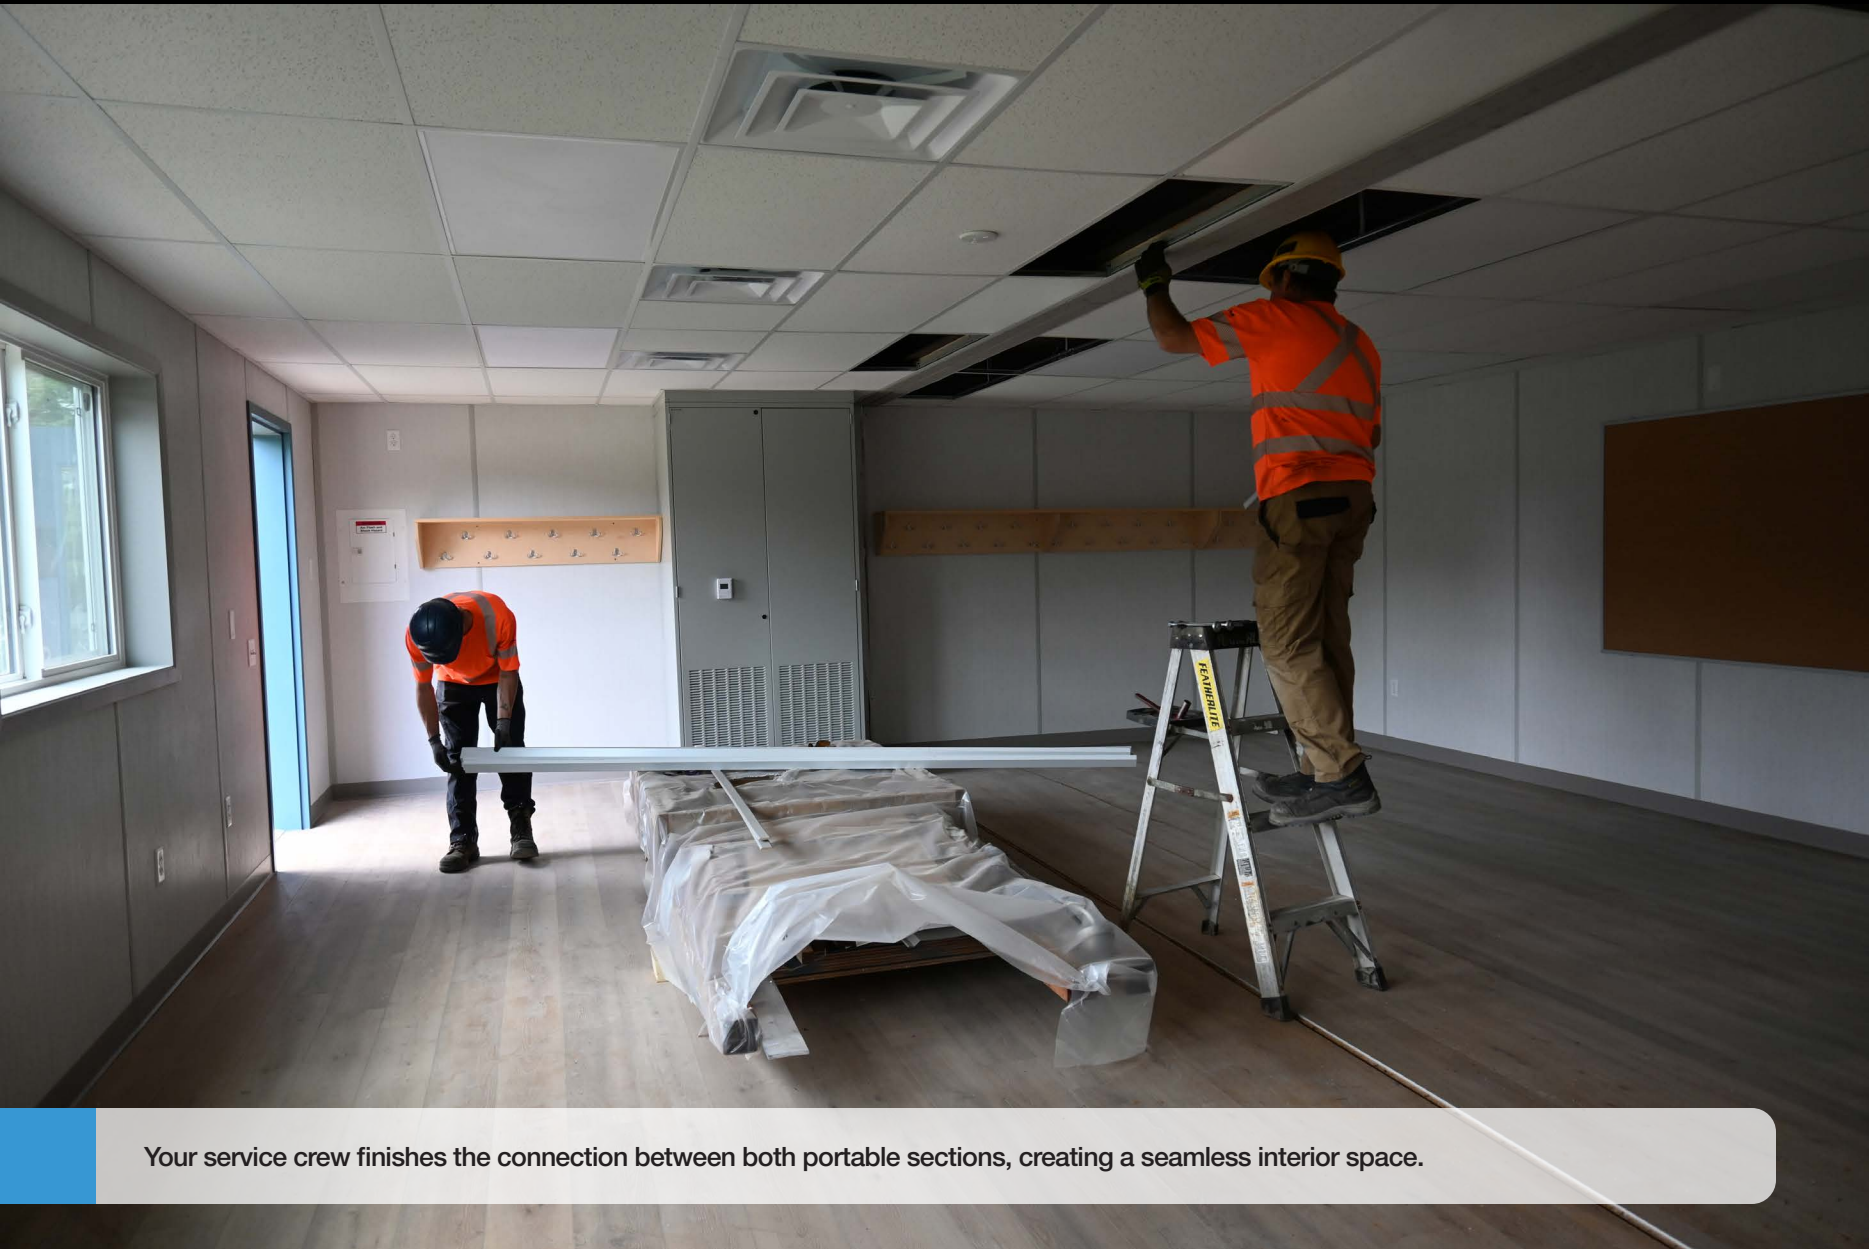

The first section of your portable is placed on foundational blocking, levelled, and secured using specialized CLM equipment.

Delivery Timeline

The second section of your portable is moved into place and secured, completing the building footprint.

Delivery Timeline

Your service crew finishes the connection between both portable sections, creating a seamless interior space.

Delivery Timeline

Delivery Timeline

Installation of your portable classroom is complete, with the building ready for final finishes.

Skirting and access systems are added to your portable classroom, creating a finished learning space ready for students and educators.
